THE HAWAII CONSERVATION ALLIANCE PRESENTS:
CONSERVATION CONNECTIONS TALK STORY

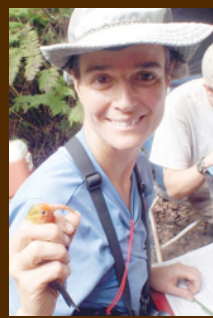

HAWAII'S NATIVE FOREST BIRDS: THEIR PAST, PRESENT, AND FUTURE

Thursday, October 20, 3 - 5pm

KAPI'OLANI COMMUNITY COLLEGE,
STEM CENTER (KOKI'O 202)
4303 DIAMOND HEAD ROAD, HONOLULU

Learn about the natural history of Hawaii's native forest birds, the Hawaiian honeycreepers. With photos, stories, and important research, speakers Laura Berthold and Dr. Lisa "Cali" Crampton of Forest Bird Recovery Projects will discuss the threats to the birds and the work that is being done to help native bird populations. Without the work that these projects do, these birds would soon be extinct. See what you can do to help!

Dr. Lisa "Cali" Crampton
