

# FREE LECTURE SERIES

Wednesday 08/29, 5:30pm @ ING Direct Cafe  
1958 Kalakaua Avenue, Waikiki

## RODENT AND MONGOOSE CONTROL TO PROTECT NATIVE SPECIES

Impacts that rats mice and mongoose have on native species, and methods for controlling and/or eradicating them

### Katie Swift

Wildlife Biologist/Predator Control Specialist  
US Fish and Wildlife Service

Katie Swift was born and raised on Oahu. She has a Master's degree in Zoology from UH Manoa. She has been working on rodent control for the protection of native species for almost twenty years and coordinates the multi-agency program for rodent and mongoose control for conservation purposes.
