

Hā'ena Ahupua'a Snapshot

LOCAL MEASURE OF MAUKA-TO-MAKAI HEALTH

The Watershed Snapshot project is a status report on ridge-to-reef health. In consultation with the Hawai'i Conservation Alliance, communities across the State identified metrics that would best define the health of their area, including socio-economic and cultural variables. In 2016, available data from researchers and resource management organizations were compiled to inform the selected metrics. Results are housed as a public resource in an online library of all related watershed-related data, and can be found at hca.maps.arcgis.com. The information is compiled as a suite of communication tools to help inform, guide, and garner support for more effective mauka-to-makai management efforts. Visit www.hawaiiconservation.org/communitysnapshot for more information.

ISLAND OF KAUA'I

"THE KŪPUNA TELL US THERE IS LESS WATER IN THE STREAMS, AND THE SCIENTISTS TELL US THAT NOT ONLY IS THERE LESS RAINFALL, BUT THE SPREAD OF INVASIVE TREES MEANS THE FOREST HOLDS ONTO EVEN LESS WATER THAN THEY USED TO. WE NEED HEALTHY FORESTS TO ENSURE THAT HĀ'ENA STILL HAS CLEAN, FLOWING WATER IN THE FUTURE."

- KAWIKA WINTER, DIRECTOR
LIMAHULI GARDEN AND PRESERVE

76 DOCUMENTED SACRED PLACES (WAHI PANA/KAPU*)

NATIVE BIRD DIVERSITY
SEABIRDS >> 6
FOREST BIRDS >> 5
WATER FOWL >> 4
SHORE BIRDS >> 3
